

So easy – just add two quarts of ANY color exterior latex paint to the kit. Detailed instructions available in the kit or at [gulfsynthetics.com](http://gulfsynthetics.com).

### More Ultimate Formulations from Gulf Synthetics

#### **DeckRevive™**

A durable and environmentally safe composite coating for wood decks, docks, boardwalks and other wood surfaces that are not typically submerged. Repairs and revives old wood. Fills cracks, locks down splinters and nails, slip and fire-resistant, in any color when you add your color choice of exterior latex paint.

#### **PermaPile™ Ultimate Pile Formula**

A modified elastomeric asphalt emulsion formulated to protect piles, wales and timber. Encapsulates wood preservatives and prevents marine borer attack. Bonds to and protects metal hardware. Can be zone-coated and applied on-site. Non-toxic and odorless. Perfect for marine piles, piers, docks, wales, jetties, wharves and bulkheads.

#### **PermaPaint™**

A polymer paint additive that transforms any latex paint into a durable, long-lasting, non-fading elastomeric coating. Mix with interior or exterior latex paint to extend the life of paint applications for years. VOC-free and environmentally safe. Can be brushed, rolled or sprayed.

All formulas are environmentally friendly.

## Why Replace Old Concrete & Aging Asphalt?

# RESURFACE

at a fraction of the cost

# A Polymer Coating that Resurfaces and Revives Concrete and Aging Asphalt in ANY Color

*Endless color choices*

- Fills cracks and covers stains, restoring and revitalizing old pool decks, patios, porches, walkways, steps, driveways and concrete docks.
- Provides a slip-resistant textured surface. Choice of roller determines the texture.
- Offers unlimited color choices. Add two quarts of ANY color exterior latex paint to the kit and achieve color matching and create decorative patterns and designs.

- Zero to little maintenance and saves thousands over the cost of demolition and replacement.
- Applies easily with everyday paintbrushes or rollers and cleans up with water.
- Is high-build and quick-setting for minimal time-out-of-service.
- A do-it-yourself, super-tough, polymer coating that resurfaces and protects outdoor living areas for years.
